

## KEEP YOUR CLOUD STRATEGY HEALTHY WITH HIPAA-COMPLIANT SAAS DATA PROTECTION.

Healthcare payers and providers continue to work toward improving patient outcomes through alignment -- and that need for alignment drives the adoption of new technologies that can increase both provider and payer agility. Many healthcare organizations are adopting cloud technology towards those goals. SaaS applications like G Suite, Office 365, Salesforce and Veeva use the cloud to streamline healthcare operations, but proper data protection, especially of protected health information (PHI) must not be sacrificed.

A HIPAA-compliant cloud-to-cloud backup and restore solution like Spanning Backup can give healthcare organizations, payers, and providers using SaaS applications peace of mind while protecting the privacy of patient data in the cloud. Spanning helps healthcare organizations protect against data loss on your side, loss due to human error, hacking, malicious activity and sync errors something cloud platform providers cannot do. (For details, see this [blog post](#).)

---

### SPANNING BACKUP PROTECTS SAAS-BASED HEALTHCARE DATA

Spanning helps organizations entrusted with PHI to use Office 365, G Suite, Salesforce or Veeva with confidence. Spanning Backup provides automated, daily backups of your application data (including metadata) and the ability to easily restore any lost or deleted data back into your environment from any point in time. The restore process is so simple that both administrators and end users can quickly and easily recover lost or deleted data without calling in an IT expert.

## RECOVERY FROM DATA LOSS SO EASY, EVEN END USERS CAN DO IT.

Spanning Backup delivers the most trusted, reliable backup and recovery for SaaS applications including G Suite, Office 365 and Salesforce. Spanning makes meeting HIPAA compliance on data retention, protection and accessibility easy for Covered Entities and their Business Associates. Spanning Backup provides:

- **Automated and on-demand backups:** Spanning Backup is so powerful that you can set it and forget it, yet also gives IT administrators maximum control and visibility over data backups.
- **Industry's most advanced recovery:** Our recovery process restores your information with files structures, sharing settings, metadata, and customizations intact. The point-in-time feature allows you to restore any historical version of data. Plus, you can restore a single file or an entire account; even restore data to another user's account with the cross-user restore feature.
- **Easy-to-use data search and restore:** The user interface is so intuitive that even end users can be empowered to resolve their own data loss issues without calling in support.
- **Advanced administration and complete status monitoring:** Spanning Backup gives admins meaningful insights into backups, alerting them to any errors with actionable instructions for resolution. We provide transparency so you can have peace of mind.
- **World-class security:** We maintain industry-leading security and availability standards, including HIPAA and SSAE 16 SOC 2 Type II compliance, as well as 128-bit SSL and 256-bit AES encryption.

"As an FDA regulated business, we have certain compliance requirements that we have to achieve - the biggest one being data retention. Because I know Spanning just works and our data in the cloud is protected regardless of what happens at Microsoft, it's one less thing we need to worry about on a daily basis."

Todd Miller

IT DIRECTOR, MILLAR, INC.

## SAAS BACKUP IS PREVENTATIVE HEALTHCARE FOR YOUR CLOUD STRATEGY.

Spanning Backup provides automated, daily backup and accurate restore via our HIPAA-compliant solutions. We'll keep your data safe and accessible, no matter what, so you can focus on what you do best: keeping people healthy.

## ABOUT SPANNING

Spanning Cloud Apps, a Kaseya company, is the leading provider of backup and recovery for SaaS applications, helping organizations around the globe protect their information in the cloud. The company provides powerful, enterprise-class data protection for Microsoft Office 365, G Suite, and Salesforce. With data centers located in North America, the EU, and Australia, Spanning Backup is the most trusted cloud-to-cloud backup solution for thousands of companies and millions of users around the world.
