

SPANNING 360

END-TO-END PROTECTION FOR MICROSOFT 365 AND G SUITE MAIL, ACCOUNTS AND DATA

Benefits

- Protection from sophisticated cyberattacks including phishing, business email compromise (BEC), account takeovers (ATO), identity spoofing and credential theft.
- Comprehensive protection against Microsoft 365 and G Suite data loss.
- Improved business continuity and organizational resiliency.

KEY CAPABILITIES

- Powerful email security including three layers of defense, enhanced with AI and machine learning.
- Integrated Dark Web monitoring for compromised or stolen credentials.
- Comprehensive, automated backup of critical Microsoft 365 and G Suite data.
- Granular, point-in-time restoration with cross-user restore.
- Unique end-user self-service functionality.

Complete Protection

Enterprise-class, end-to-end protection for Microsoft 365 and G Suite with advanced capabilities to help prevent, anticipate and mitigate account compromise and data loss caused by phishing, ransomware and malware attacks, human error, malicious behavior, and configuration and sync errors.

Prevention: Detect and block even the most sophisticated email threats with Graphus, the powerful phishing defense platform that provides three layers of comprehensive email security via patented AI technologies.

Anticipation: Secure accounts at risk before data loss occurs with Spanning Dark Web Monitoring. It combines human expertise and sophisticated dark web intelligence with comprehensive search capabilities to identify, analyze and proactively monitor your organization's compromised or stolen credentials.

Mitigation: Enable end users as well as administrators to quickly find and restore data to its original state in just a few clicks with Spanning Backup. Cloud-native Platform 3 architecture enables enterprise scale and performance, unlimited data storage and retention as well as industry-leading security and compliance.

Complete Simplicity

Purpose-built, cloud-native technology that is remarkably easy to install, manage and use. It requires no hardware, installed software, redirection of email routing or configuration of service accounts. The components activate as apps within Microsoft 365 or G Suite and install in minutes. The solution is fully automated with an intuitive user interface, enabling end-user functionality and simplifying administration.

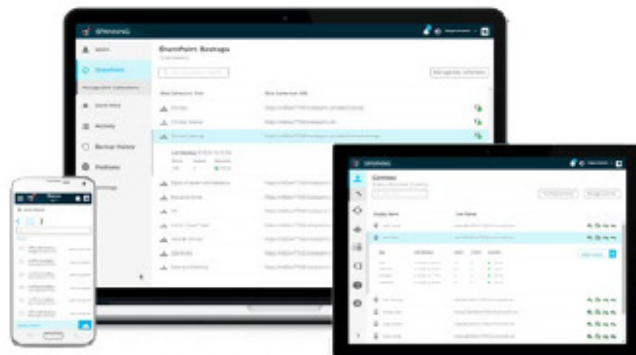

Complete Value

Provides maximum value by combining comprehensive protection, streamlined administration and end-user self-service functionality to reduce IT burden with transparent, per-user pricing and unlimited storage and retention.

Email Security:

Three layers of defense powered by patented AI technology that monitors communication patterns between people, devices and networks to reveal untrustworthy emails.

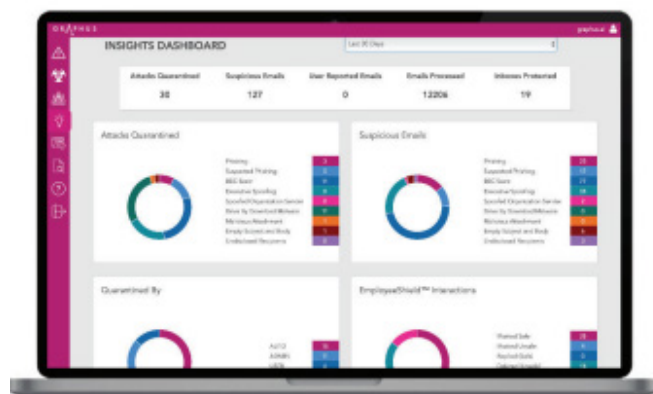

- TrustGraph automatically detects and quarantines malicious emails.
- EmployeeShield places an interactive warning banner at the top of potentially suspicious messages.
- Phish911 empowers employees to bolster email security by proactively quarantining messages they deem suspicious for IT to investigate.

Dark Web Monitoring:

Continuous and intelligent search, analysis and monitoring of the dark web for potentially compromised or stolen Microsoft 365 and G Suite credentials.

- Report with current status as well as alerts of newly identified compromised accounts.
- Customizable dashboard enables filtered views based on Date, Active Status, Type, Source and more.

Backup and Recovery:

Comprehensive, reliable backup of all critical data from Microsoft Exchange Online, SharePoint Online, OneDrive and Teams to G Suite Gmail, Drives and Sites.

- Granular search and point-in-time restore including cross-user restore.
- Self-service functionality enables end users to restore their own emails and documents.
- Transparent reporting with detailed status history and immutable activity log.
- Enterprise-class security and compliance; SSAE 16, SOC2 Type II certified infrastructure globally; COBIT5; HIPAA certified; FERPA; GDPR compliant.
